### Pumps and Process Equipment - Central States Group

The pump moves water through the drains, pipes and other equipment in your pool. Without a pump you cannot filter, heat or clean your water. Single-speed pumps only run at one constant high speed, but a VS pump is able to change the RPMs (revolutions per minute) of the motor in order to be more efficient.

### Pumps & Motors - Pool & Spa Equipment

The ("SPL") electric motors are typically used on "home" air compressors. Horsepower is designated as "SPL" 56 Frame motors have a 5/8" Keyed shaft. If your motor is part of the compressor head-we do not have a replacement motor, it is only available from the manufacture, such as Coleman or Sears. If your motor mount pivots, like some Sears ...

### Diesel Powered Water Pumps - Water Pumps Direct

Lubricate the motor and pump bearing per manufacturer's guidelines. Be sure not to over lubricate. More bearing damage occurs as a result of over greasing than under greasing. If the bearing has a vent cap, remove the cap and run the pump for 30 minutes before reinstalling cap. This will allow excess grease to work its way out of the bearing.
