managerial or technical decision making. In the computer application of modeling and simulation a computer is used to build a mathematical model which contains key parameters of the physical model. The mathematical model represents the physical model in virtual form, and conditions are applied that set up the experiment of interest. The simulation starts -

simulation (M&S) are attractive and widely used techniques for the study of the performance of computer networks.

They provide detailed results without disturbing network operation or even without the need of network availability.

This chapter summarizes the whole topic of performance M&S applied to computer networks.
