LECTURE NOTES ON CONSTRUCTION PLANNING AND SCHEDULING

Planning, scheduling is an important part of the construction management. Planning and scheduling of construction activities helps engineers to complete the project in time and within the budget. The term 'Construction' does not only denotes physical activities involving men, materials and machinery but also covers the entire gamut of activities from conception to realization of a construction project.

Planning and scheduling are distinct but inseparable aspects of the successful project. Planning selects policies and procedures in order to achieve objectives; scheduling converts a project action plan into an operating timetable. Together, the project plan, budget and schedule are the major tools for the management of projects and serve as the fundamental basis for monitoring and controlling ...
