### How Babies Are Made: Schepp, Steven, Andry, Andrew ...

A baby is made Each sperm carries a different chromosome—an X or Y. While a man can't control which sperm will make it to the egg, he will ultimately decide the sex of the baby because all unfertilized eggs carry an X chromosome. If the egg meets with a sperm that is also carrying an X chromosome, little Julie will be here in nine months.

### How are babies made? - Today's Parent

How Are Babies Made? Making a baby starts with two key things: Eggs and sperm. In a woman's ovaries, there are hundreds of thousands of tiny eggs, waiting to make the trip down the fallopian tubes and into the uterus. These eggs are an integral part of a woman's body - in fact, when a baby girl is born, her body contains millions of eggs.
