Engineering's Anti-Chatter Technology (ACT) works on Hunter's BL Series Bench Lathe and the on-car lathe, AutoComp Elite®. This technology provides better brake rotor surface finish while also allowing the lathe to cut much faster.

BL Series Bench Lathe | Hunter Engineering Company®

Hunter's AutoComp Elite® on-car brake lathe compensates in under 12 seconds, on average, using direct compensation. Other methods may take up to two minutes using wandering compensation. Automatic Compensation enhances speed and accuracy by calculating the exact position of the compensation plates to eliminate guess work.
