U.S.C.G. Merchant Marine Exam QMED Illustrations: 9 . 20. A two-stroke cycle diesel engine requires less starting air than a four-stroke cycle diesel engine, of equal displacement, because the two-stroke cycle diesel engine \_\_\_\_\_.  
o (A) has little or no internal friction  
o (B) has a lower effective compression ratio

### U.S.C.G. Merchant Marine Exam QMED Q804 Oiler, Part I ...

U.S.C.G. Merchant Marine Exam Third Assistant Engineer Illustrations: 16 . Choose the best answer to the following Multiple Choice Questions. 1. An increase in the air inlet manifold pressure of a diesel engine will result in a/an \_\_\_\_\_.  
o (A) decrease in maximum cylinder pressure  
o (B) increase in ignition lag

### U.S.C.G. Merchant Marine Exam Third Assistant Engineer ...

Below are marine engineering questions and answers which you may likely come across someday. They seems simple. These are marine engineering questions and answers which may look simply but might be difficult to the young professionals. this post will help to build up a basic understanding and to become familiar to such question .

### Marine Engineering Questions And Answers - Marine And ...

10. In a 2-stroke marine diesel engine if the o-ring for Jacket cooling water sealing is leaking then  
A. The water will leak directly into the crankcase  
B. The water will leak into the under piston space  
C. The water will come out through tell-tale hole provided between the two o-rings  
D. The water will come out from the top of cylinder jacket ...
