become weak and waste away. You may also have symptoms such as spasms, twitching, and pain. Examples of neuromuscular disorders include. Amyotrophic lateral sclerosis; Muscular dystrophy; Myasthenia gravis

Neuromuscular Disorders | MedlinePlus

The accessory nerve is

Online Library

Nerve And Muscle

a cranial nerve that supplies the sternocleidomastoid and trapezius muscles. It is considered as the eleventh of twelve pairs of cranial nerves, or simply cranial nerve XI, as part of it was formerly believed to originate in the brain. The sternocleidomastoid muscle tilts and rotates the head, while the trapezius muscle,

Online Library

Nerve And Muscle

connecting to the scapula, acts to shrug the shoulder.

Accessory nerve - Wikipedia

It is most often caused by an injury to the bones, joints, muscles, tendons, ligaments, or nerves. This can be caused by jerking movements, car accidents, falls, fractures, sprains, dislocations, and direct blows to the muscle.
