As the Nation's patient safety agency, AHRQ is observing Patient Safety Awareness Week March 8-14 to increase awareness about patient safety among health professionals, patients, and families. Join us as we help to bring together and engage healthcare professionals and patients to make care safer.

Patient Safety and Quality Improvement | Agency for Health ...

Patient safety practices protect patients from accidental or preventable harm associated with healthcare services. Together, care quality and patient safety improvement activities can help healthcare teams achieve the 6 aims described in the Institute of Medicine's publication Crossing the Quality Chasm: A New Health System for the 21st Century. It states that care should be:

Quality & Patient Safety - Health IT Playbook

The Patient Safety and Quality Improvement Act signifies the Federal Government's commitment to fostering a culture of patient safety. It creates Patient Safety Organizations (PSOs) to collect, aggregate, and analyze confidential information reported by health care providers. Currently, patient safety improvement efforts are hampered by the fear of discovery of peer deliberations, resulting in under-reporting of events and an inability to aggregate sufficient patient safety event data for ...

Improving Outcomes and Lowering Costs through Culture, Clinical Analytics, Evidence-Based Practices, and Adoption. The conference emphasized that patient safety and quality is an "and" science that centers on culture (organization, processes, etc.), healthcare (clinical) analytics, content (evidence-based practices), and frontline adoption of best practices.

Improving Patient Safety and Quality in Healthcare

Patient safety and quality of care in the hospital require a team of dedicated people to effect change. Orchestrating the team effectively is the responsibility of an attending physician. With the numerous "handoffs" that take place during hospitalization, the potential for medical errors increases exponentially.

Improving Patient Safety and Quality of Care | The Hospitalist

The Patient Safety and Quality Improvement Act of 2005 (PSQIA) establishes a voluntary reporting system designed to enhance the data available to assess and resolve patient safety and health care quality issues. To encourage the reporting and analysis of medical errors, PSQIA provides Federal privilege and confidentiality protections for patient safety information, called patient safety work product.

Patient Safety and Quality Improvement Act of 2005 Statute ...

Safety of patients during the provision of health services that are safe and of high quality is a prerequisite for strengthening health care systems and making progress towards effective universal health coverage (UHC) under Sustainable Development Goal 3 (Ensure healthy lives and promote
