MySQL :: MySQL Documentation

SQL is a standard language for storing, manipulating and retrieving data in databases. Our SQL tutorial will teach you how to use SQL in: MySQL, SQL Server, MS Access, Oracle, Sybase, Informix, Postgres, and other database systems.

SQL Tutorial - W3Schools

Database programming using SQL (T-SQL, PL/SQL) is left behind other programming languages. All the code is committed directly to code repository on the server. It is not possible to compile and run code locally. And there is no code version control built into popular databases. This means that, unless you copy code somewhere or use dedicated version control tool, you only have most recent version of each procedure or function and there is no way to check changes.

How to Document Stored Procedures and Functions in ...

The T-SQL reference topics encompass multiple versions of SQL Server, starting with 2008, as well as the other Azure SQL services. Near the top of each topic is a section that indicates which products and services support subject of the topic.

Transact-SQL Reference (Database Engine) - SQL Server ...

What is pldoc? pldoc is an open-source utility for generating HTML documentation of code written in Oracle PL/SQL. The goal is to provide a tool analogous to javadoc for Java. To get quick idea what the tool does, look at the following example:

SourceForge - pldoc

To generate documentation, you will need to create a design in Oracle SQL Developer Data Modeler. The easiest way to create the new design is simply open Oracle SQL Developer Data Modeler. In Browser window you will see folder “Designs” and “Untitled 1” inside (this is your design you will work with).

How to generate database documentation with Oracle SQL ...

PostgreSQL: Documentation: 8.4: PL/pgSQL - SQL Procedural ...

The most important benefit of a cursor variable is that it enables passing the result of a query between PL/SQL programs. Without a cursor variable, you have to fetch all data from a cursor, store it in a variable e.g., a collection, and pass this variable as an argument. With a cursor variable, you simply pass the reference to that cursor.
