Steps On How To Make

Making the Preliminary Measurements 1. Measure the height of the area where you will install the stairs. This is also called the total rise. 2. Divide the total rise by the typical rise per step. This will give you the total number of steps on your stairs. 3. Divide the total rise by the number of ...

How to Build Stairs (with Pictures) - wikiHow

Building wood steps is not rocket science if you start right. Stairs are built the same whether outdoors or indoors with the only difference being materials used and the fact that your work has to fit in a specific space indoors. Redwood, cedar or pre-treated lumber should be used for exterior steps.

Making Wooden Steps | Hunker

The next step is how to cut the curd down from a giant blob into smaller cubes or chunks. You can do this with a 'cheese harp', with a knife or even with a whisk. The size to which you cut the curds will dramatically effect the amount of moisture retained in your final cheese; the smaller the initial pieces, the drier (and more ageable) the ...
