I'm looking for the governor RPM spec on a HSK600 tecumseh on a MTD snowblower. I've got a manual to tell me how to adjust it, but it doesn't say what the spec is. All it will tell me is: "R.P.M. settings may be found in microfiche catalog, card number 30." It is currently running at 4600 pm. Any and all help would be greatly appreciated. Thanks.
